

Certificate of Conformity

This is to certify compliance of HomeGuard Protectacote Termite and Waterproofing Barrier

Conditions and Limitations

- This certificate is limited to the details within this certificate, including the compliance elements, product description and purpose or use. This certification is to be read, considered used as a whole document and reproduced in its entirety.
- In accordance with BCA Volume One 2016: B1.4 (i), (i) & (ii), including NT & QLD state & territory variations, and BCA Volume Two 2016: Part 3.1.3.2 (b), including QLD state variations, a durable notice must be permanently fixed to the building in a prominent location, such as a meter box or the like indicating:
 - The method of termite risk management; and
 - The date of installation of the systems; and
 - The installers or manufacturers recommendations for the scope and frequency of future inspections for termite activity.
- Inspections must be undertaken annually in accordance with the above installation manuals to determine that no bridging or breaching of the termite management system has occurred.
- Compliance with AS 3660.1:2000 is valid until 30 April 2017 when the transitional period expires.
- This Certificate excludes compliance of the product in relation to damp-proofing.

Product Purpose, Use and Application

- When properly installed, the system forms a full and continuous waterproof and termite resistant perimeter barrier that works by forcing termite activity into the open where it can be detected by regular inspection.
- Must be installed in accordance with the Installation Manual for HomeGuard Protectacote Termite and Waterproof Barrier Version 1.4 November 2015.
- Only to be installed by HomeGuard Protectacote Termite and Waterproofing Barrier accredited installers.
- When used as a termite barrier in conjunction with a concrete slab the slab must be designed and constructed according to AS2870:2011 or AS3600:2009 (including amendment 1, as per BCA 2016).
- When used as a termite barrier in masonry walls, the mortar joint under the barrier shall be full (have no gaps or porosity to provide an inspection zone).

Complies with the National Construction Code – Building Code of Australia 2016

- It is advised to check that this Certificate of Conformity is currently valid and not withdrawn, suspended or superseded by a later issue by referring to the ABCB website, www.abcb.gov.au.

Product Description

HomeGuard Protectacote Termite and Waterproofing Barrier is an acrylic polymer latex composition with a high loading of inorganic fillers. On curing, it forms a tough, flexible, termite resistant and waterproof film. Bifenthrin is the active ingredient in HomeGuard Protectacote Termite and Waterproofing Barrier. The active ingredient content is such that when these liquid products cure, the resulting barrier has a bifenthrin content of 1g/kg. The active ingredient is uniformly dispersed throughout the product. It both kills and repels termites.
